"No one likes to see the dark side of a mythic person."

WHAT DO YOU THINK?

Genovese nobleman or Catalan pirate? Adventurous explorer or greedy tyrant? What if the Italian gentleman who discovered America was in fact a brutal torturer and slave owner? And what if he wasn't even Italian?

Schoolchildren may learn about a daring hero who proved the Earth wasn't flat. But because his biography is pocked with holes, Christopher Columbus is a figure around whom elaborate theories and enigmatic rumors have long circulated. This year, the 500th anniversary of his death, two Spanish scholars are working to clear up some of the mysteries.

José Antonio Lorente, a geneticist at the University of Granada, is attempting to resolve one of the greatest enigmas — the question of Columbus's origins. In 1927, Peruvian historian Luis Ulloa Cisneros claimed Columbus was from Catalonia — in what is today northwestern Spain — rather than from the Italian port city of Genoa.

Since then, theories have proliferated, some suggesting that Columbus was a Catalan nobleman who rebelled against King Ferdinand's father, Valencia, and the south of France with the last name of Colón, Colom, or Columbo, Lorente is comparing their DNA with that taken from the bones of Columbus, his brother, and Prince Carlos de Viana. "This way, we can try to determine which population with the same last name as Columbus has the most genetic similarities and differences to him," says Lorente.

A historian at the University of Seville asked Lorente (who had previously used genetic testing to determine that bones in the Cathedral of Seville belonged to Columbus's own illegitimate son), to help resolve the Catalan/Genovese issue.

Collecting saliva samples from hundreds of people in Catalonia, the Balearic Islands, Genoa, Valencia, and the south of France with the last name of Colón, Colom, or Columbo, Lorente is comparing their DNA with that taken from the bones of Columbus, his brother, and Prince Carlos de Viana. "This way, we can try to determine which population with the same last name as Columbus has the most genetic similarities and differences to him," says Lorente.

The study, results of which were supposed to be released last week to coincide with the Spanish celebration of Columbus Day, has been delayed due to the technological difficulties. "Right now, we haven't developed sufficient markers that can be applied to DNA that comes from bones," says Lorente. "We're working on improving it every day, but we can't say when we'll have results."

Until he finds conclusive answers, the geneticist finds the Catalan theory compelling. "Although the majority think he was Italian," Lorente comments, "there are certain aspects of his biography that suggest non-Italian origins."

But while Columbus's origins remain undetermined, Consuelo Varela, a historian at Spain's Consejo Superior de Investigaciones Científicas, has answered another question: Why, once he was governor of Hispaniola, did Columbus fall so far from favor that Ferdinand and Isabella ordered him arrested and returned in chains to Spain?

After archivist Isabel Aguirre discovered an uncatalogued transcript of Columbus's trial and brought it to Varela's attention, the answer was clear to her: Even by the uncharitable standards of 16th-century Spanish colonies, Columbus was a brute.

In her book "The Fall of Columbus," Varela uses the testimony from 23 witnesses contained in the document to show that as governor of Hispaniola, Columbus regularly used torture to maintain order on the island. "It was far more brutal than we had known," says Varela. "It was a frontier society, with terrible misery and injustice."

Columbus was also a strong supporter of slavery, refusing to baptize the indigenous people of Hispaniola so that he could enslave them (Spanish law prohibited the enslavement of Christians), and auctioning Spaniards into slavery, including a young boy caught stealing, as punishment. Varela also notes that Columbus was "surprisingly greedy. He was always tremendously worried about making money."

Although academic specialists have largely hailed Varela's work, popular readers have been less welcoming. An Italian author of historical novels recently wrote her to complain about the unflattering portrait and accused her of falsifying the document. Varela understands the resistance. "No one likes to see the dark side of a mythic person," she says.

For both scholars, it is the mythic elements of Columbus's personality and history that explains public fascination with him. "Columbus is a universal figure," says Lorente. "When you add in the fact that he never said anything about his origins, you have the perfect mystery."

Not so much a question of "or": Columbus was both an intrepid explorer and a tyrant. He was directly responsible for the enslavement, and ultimately the extinction of the Carribean Arawak peoples. He laughed at the passivity and trust demonstrated by these people, and even bragged in letters of how easy the process of enslaving them would be. Hooray for genocide! Let's take the kids to Wal-Mart and buy some more flags! For further details on this hero, you might like to read Howard Zinn's "A People's History of the United States".

p.s. Happy (belated) Columbus Day.

I'm really tired of hearing about Columbus. This is not the United States of Columbia. Why don't we hear about Amerigo Vespucci?

The Italian Colon,(christopher columbus) was not schooled, could not read, parents were not married, and worked as a cabin boy. (per info from recent trip to Italy). The spanish Columbus was a sea captian, could speak several languages, was from a wealthy family, was a pirate, did kill for others riches. I think the spanish columbus is the "real" columbus who did discover the americas, after Leif Erickson did, anyway.

To me, the mystery of mysteries is how he got credit for discovering America in the first place. About 500 years late and bumping into islands that got in his way, slaughtering indigenous peoples, while pursuing mostly his own wealth...he seems a poor candidate for yearly celebrations in N. America. Cheers to the first Europeans of Vinland! Can't we get a day off from work for the Eric or Lief, too?
