significant differences between men's and women's sexual fantasies, according to a University of Granada study. The fact is that both sexes have intimate sexual fantasies involving their partner or loved one. Men have more sexual fantasies (positive and negative) than women, which would confirm the old believe that men think more frequently about sex than women.

In the study, the researchers took a sample of 2250 men and women aged between 18 and 73 years, who had a sexual relationship for
